**Why tactile books?** Books with tactile elements offer hands-on learning, appeal to a diversity of learning styles, and can be particularly beneficial for children with impaired vision. Tactile books include elements such as Braille, pop-ups, cut-outs, textured material, lift-the-flaps, and finger puppets. They’re also just plain fun for all young learners!

Designed especially for the young braille reader, this tactile reference book features a fascinating selection of creatures, from bears and big cats to birds and bugs. Every entry is written in both braille and large print to allow all readers the opportunity to discover fascinating facts about animals. The entries are also illustrated with large, tactile images, including a leopard with fuzzy flocked fur. Advanced readers. (j) QL151 .A54 2016
